Laura Abels
Child Psychiatric
Clinical Nurse Specialist

What Makes 4KidHelp Different ...

Partnership We are eager to collaborate with current caregivers and families.

Our Style We are proud that our practice is built on specialty psychiatric care and love. We treat the whole child. We do not force medications. We support faith, in all of its forms, as the center of life.

Sophisticated Diagnosis We use the medical model to systematically analyze a problem and create a multidisciplinary plan with families and caregivers.

Results Our kids get better. We focus on returning our patients to a happy life by building on their strengths. They improve quicker and faster with our approach.

Experience Our Staff has combined experience of 125 years, with the youngest staff having at least 10 years experience.

Time We spend it and we listen. The first appointment is for 90 minutes. We see patients soon for follow up. We understand that families want kids better as soon as possible.

Family Focused We serve patients from ages 3 through 24. We do not see a child; we see a family and surrounding systems of support.

& Coach

Let Us Work With You...

I am excited to share the vision of 4KidHelp - Center for Child and Adolescent Psychiatry. I am a medical doctor who trained at Harvard in brain & behavior problems of kids, teens and adults. I was on staff at Harvard Medical School and have been the Medical Director of many programs for children including the state hospital program for the most behaviorally disturbed children in Massachusetts.

My dream is to create a multidisciplinary regional center for child mental health in Canton. I'm proud to announce we are on our way. I work with a growing group of highly experienced & talented colleagues who think out of the box. We bring the cutting edge treatments of Harvard and combine them with the warmth & family values of the Midwest.

We have a practice filled with knowledge & gifts, combined with the precision of medical diagnosis. Our kids usually come with little hope; they finish with joy. We use the patient's God-given strengths to build a future rather than focus on past mistakes.

I invite you to learn and work with us to better the lives of children, adolescents, young adults and families in Northeast Ohio.

Let us work with you.
